- Partners with the local Southern Hills Career and Technical Center to develop workforce ready students.
- Brown County Chamber of Commerce member and member of the Southern Ohio Buckeye Safety Council.
- Sponsors a local softball team, participates in local Wounded Warrior project events and constructs a float to participate in the local county fair.

# Stanley Black & Decker in the U.S.

Stanley Black & Decker is the world's largest tools and storage company, the world's second-largest commercial electronic security company, and a world-leading provider of engineered fastening systems, with unique and powerful growth platforms in the oil and gas and infrastructure industries. Stanley Black & Decker is the company behind many leading brands, including Stanley Black + Decker, DeWalt, Porter Cable, Irwin, Lenox, Bostitch, MAC Tools, and more.

## OUR HISTORY

Since 1843, Stanley Black & Decker's goal has been simple: provide tools and solutions that make life easier. Founded and headquartered in New Britain, Connecticut, we have a nearly 175-year-old history of manufacturing in the United States. Today, Stanley Black & Decker has grown into a successful American company with a global presence, proudly employing about 54,000 workers across the company and its brands.

## MANUFACTURING IN THE U.S.

Our longstanding strategy to "make where we sell" is central to Stanley Black & Decker's success. Manufacturing in the United States is nothing new to Stanley Black & Decker. We have made products in the United States since our founding and have increased United States tools manufacturing jobs by 40 percent over the last three years (2,200 – 3,000 jobs), and plan to expand from close to 40 percent localized manufacturing today to more than 50 percent over the next three years.

While manufacturing in the United States is not always an obvious choice to some, it makes good business sense for us. We know our end users generally like to buy products made in their own countries, especially professionals in the trades. Our "make where we sell" strategy improves the supply chain, mitigates currency exposure, and lessens harmful environmental impact.

## GROWTH PLAN

In early 2017, Stanley Black & Decker announced its purchase of the venerable Craftsman brand from Sears. We plan to bring Craftsman manufacturing back into the United States. This acquisition will give Stanley Black & Decker the rights to develop, manufacture, and sell Craftsman-branded products in non-Sears retail, industrial, and online sales channels across the United States and in other countries. To accommodate the future growth of the Craftsman brand, we intend to expand our manufacturing.

**40%** ↑

**Increase in U.S. manufacturing jobs**

In the last two years, we facilitated a 40 percent increase in U.S. manufacturing jobs in our tools and storage business.

We own and operate 30 manufacturing plants in the United States.
